

Introduction to disorder

Soft Matter In and Out of Equilibrium

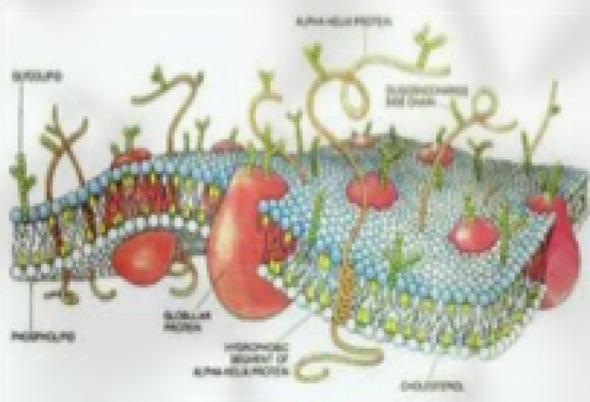

Leo Radzihovsky

Outline

- Introduction and motivation
- Disorder near a continuous phase transition
- Disorder near ordered states
- Examples of physical systems

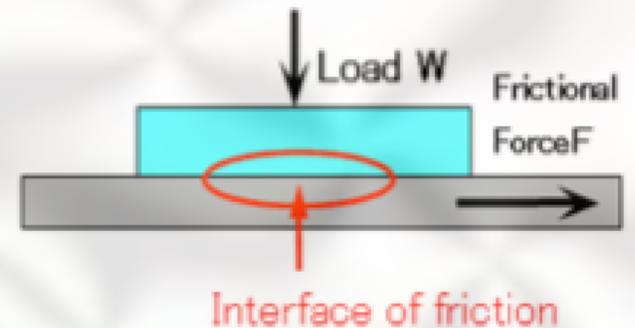

Physical examples

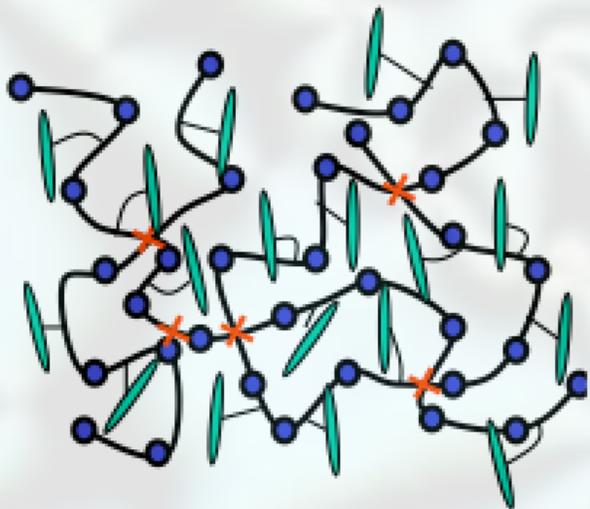

(a) biological membrane

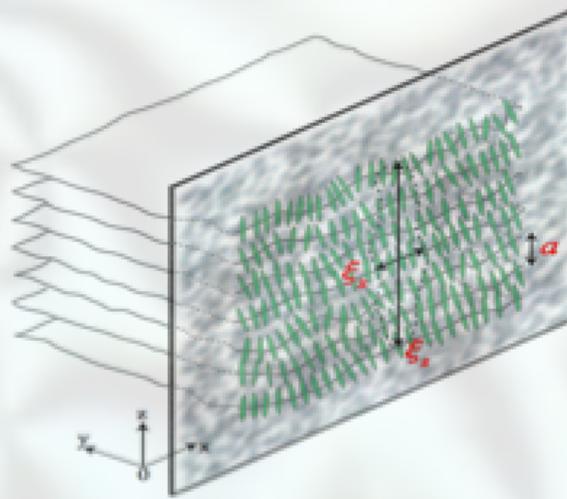

(b) wrinkled sheet

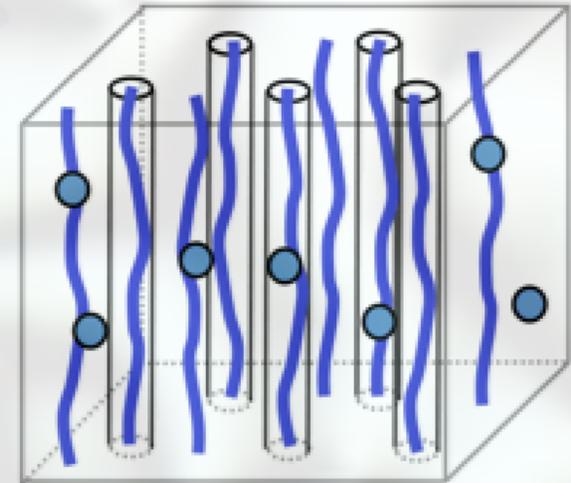

(c) friction via crystal pinning

(d) nematic elastomer

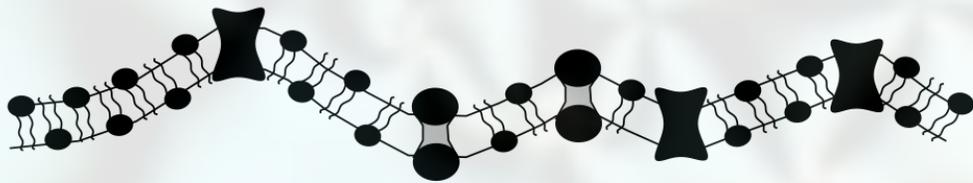

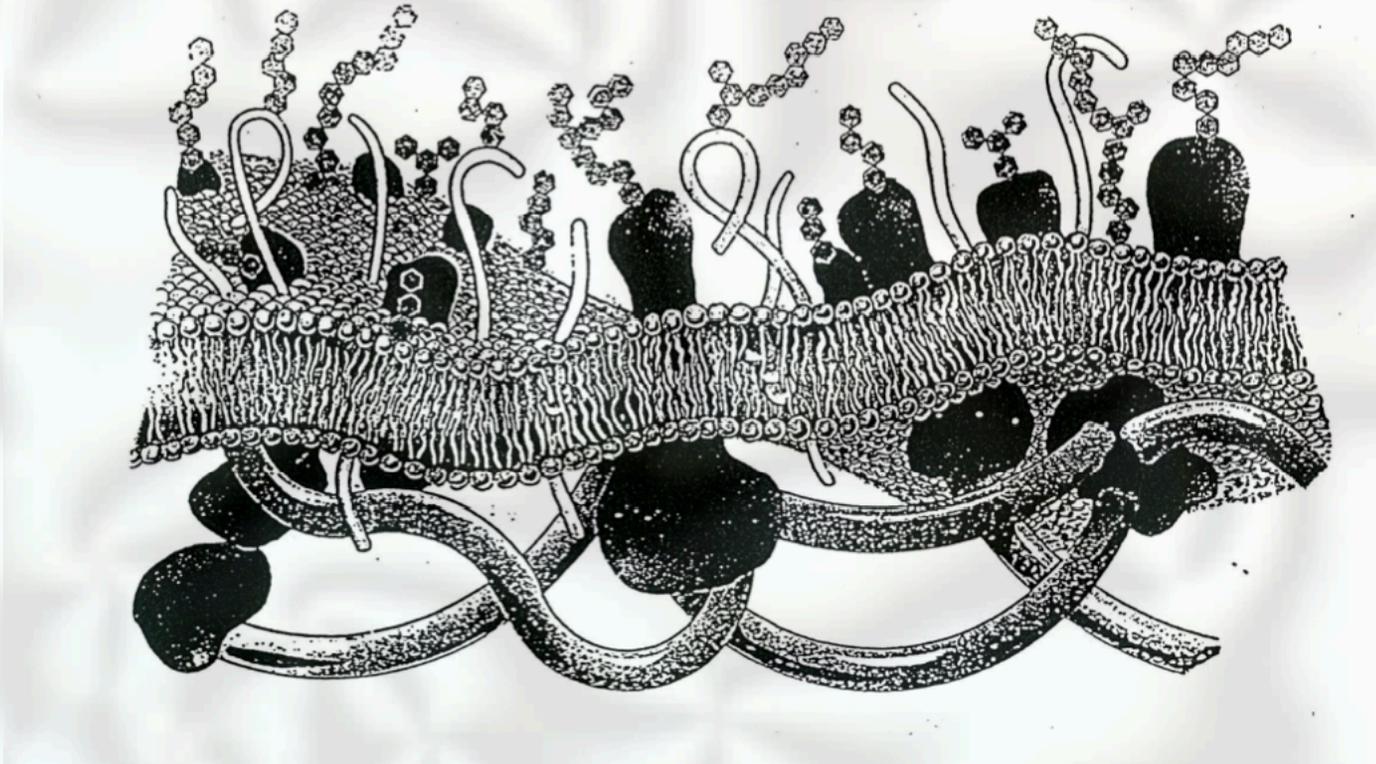

(e) smectic on dirty substrate

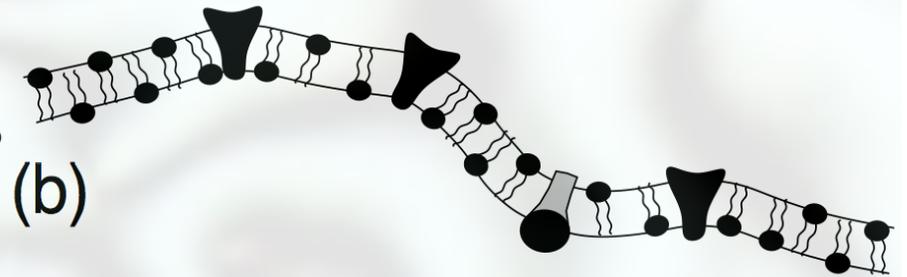

(f) vortex lattice with pinning

Disordered bilayer membrane

(a)

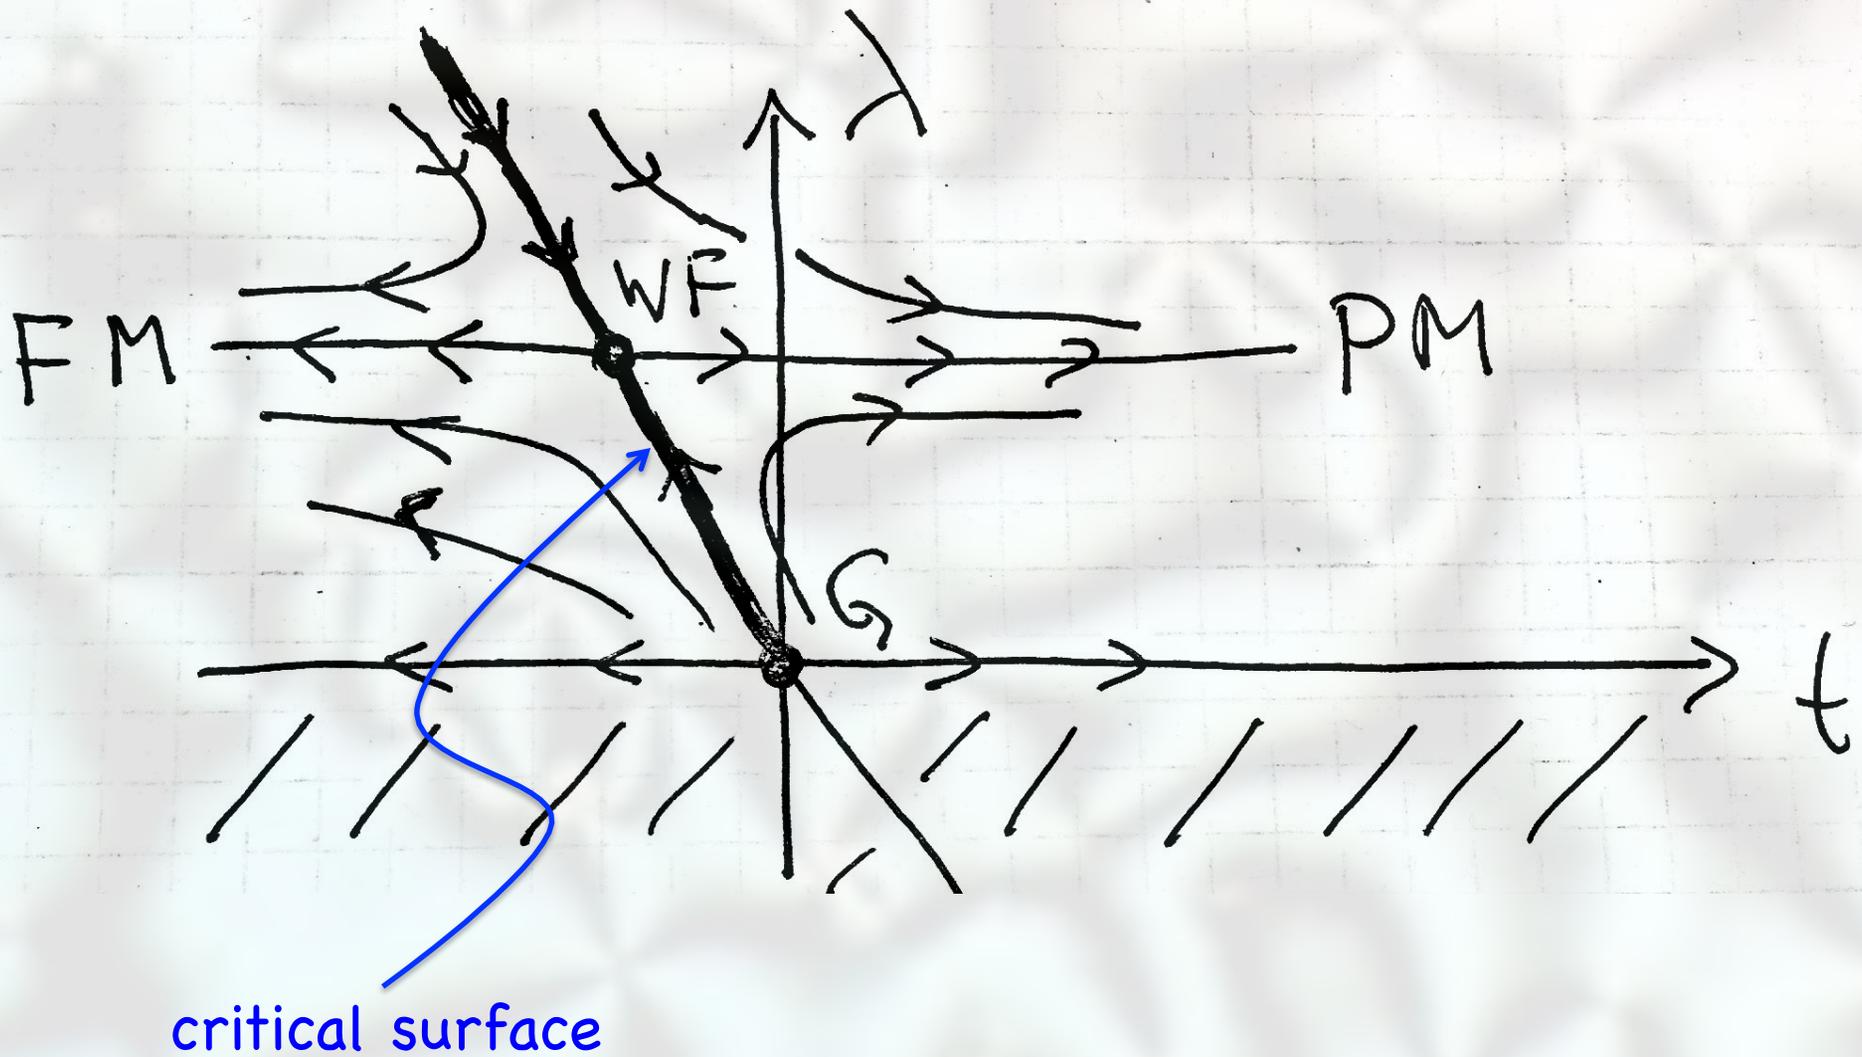

random-bond curvature disorder

(b)

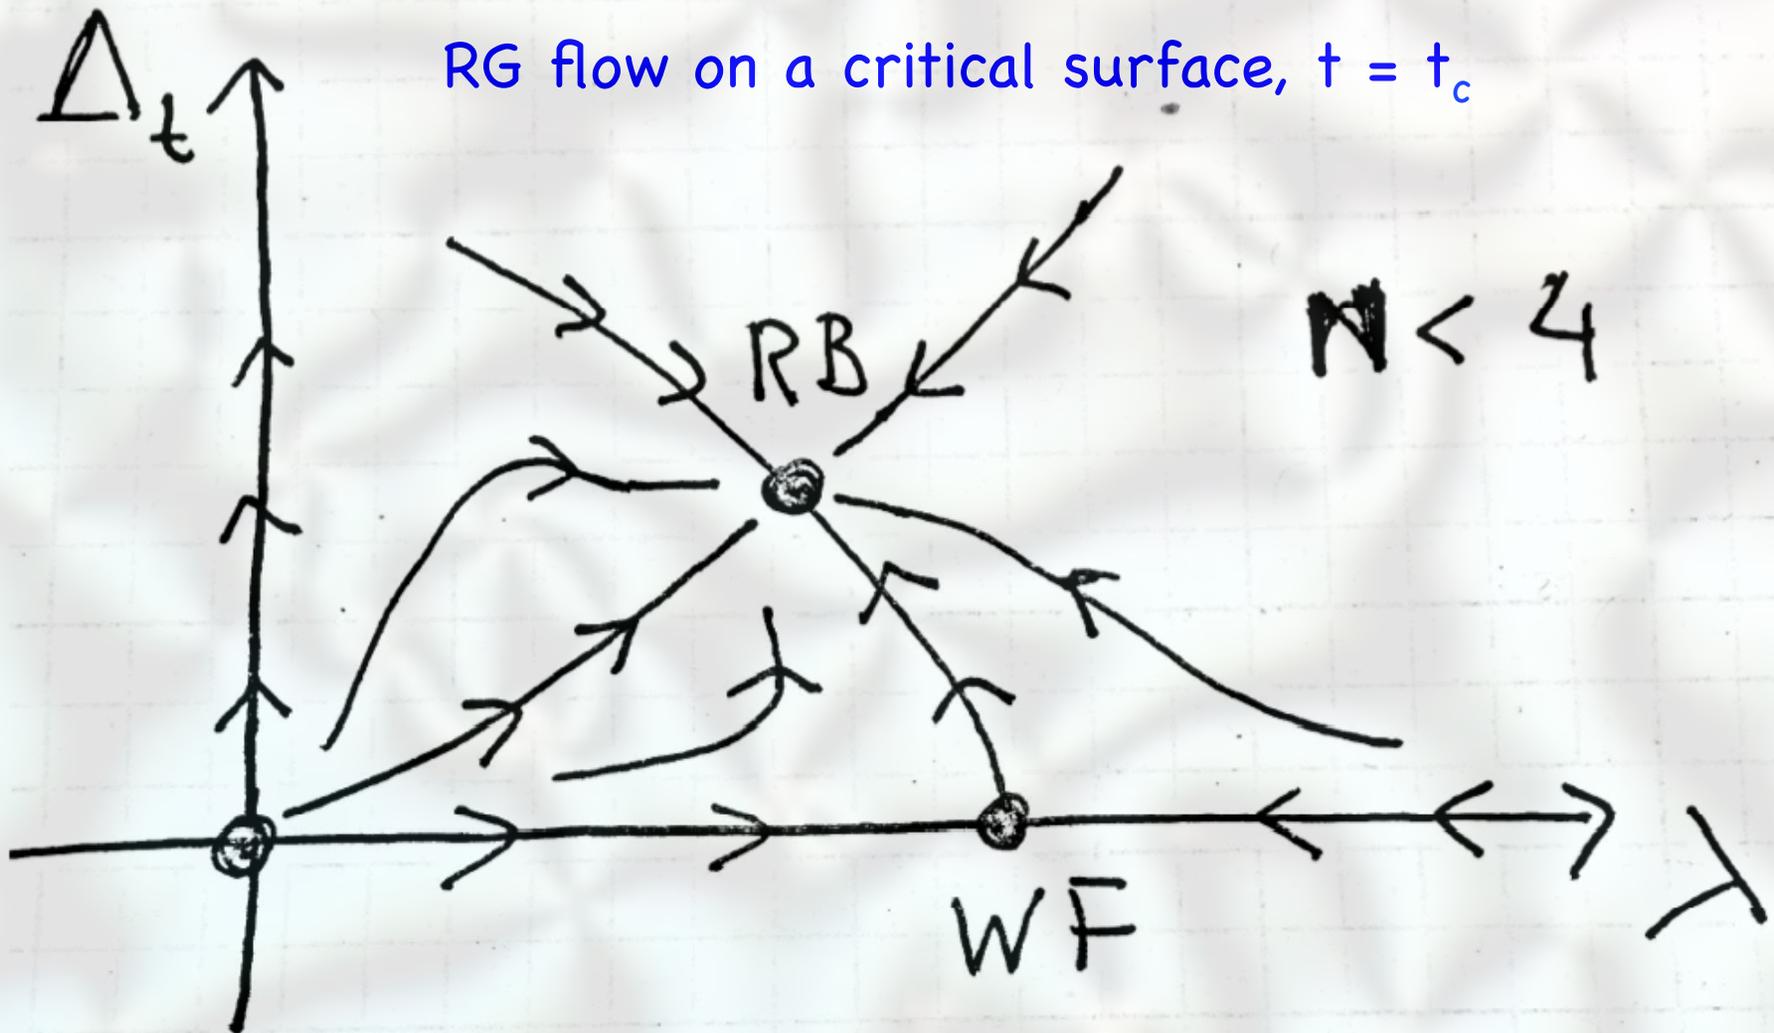

random-field stress disorder

Disorder-free critical point

Random-bond critical point

RG flow on a critical surface, $t = t_c$

Random-field critical point
