

Michel Pleimling

Aging phenomena in magnetic systems

Adapted from the forthcoming book (Springer, Winter 2009/2010) *Nonequilibrium phase transitions Volume 2 – Ageing and dynamical scaling far from equilibrium* by Malte Henkel and Michel Pleimling

May 20, 2009

Springer

Contents

1	Introduction to aging phenomena	1
1.1	Aging in mechanically deformed polymers	1
1.2	Correlations and responses	4
1.3	Aging in spin glasses	6
1.4	Aging in simple magnets	9
2	Phenomenology of aging	15
2.1	Scaling forms	15
2.2	Scaling behavior of integrated responses	19
2.3	Values of the aging exponents a and b	24
2.4	Values of the autocorrelation and autoresponse exponents	26
3	Aging in coarsening systems	29
3.1	Non-equilibrium critical dynamics	29
3.2	Disordered systems I: ferromagnets	30
3.2.1	Phenomenological description	32
3.2.2	Simulational studies	34
3.3	Disordered systems II: critical glassy systems	36
